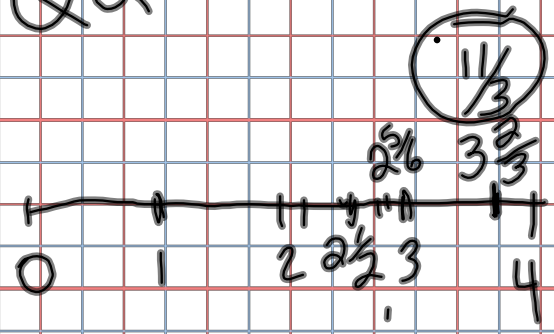
p. 94

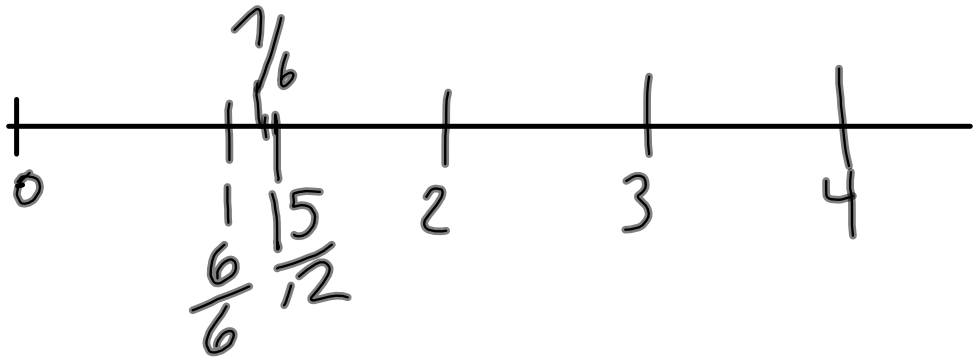
Q2

$\frac{11}{3} \div 3\frac{2}{3}$



$2\frac{1}{2}$

$2\frac{5}{6}$



$\frac{7}{6}$ $\frac{15}{12} = 1\frac{3}{12} = 1\frac{1}{4}$ $1\frac{2}{9}$

15-12=3

$\frac{12}{4} = 3$

$\frac{18}{4} = 4\frac{2}{4} = 4\frac{1}{2}$

$4 \times 4 = 16$
$18 - 16 = 2$

$\frac{16}{3} = 5\frac{1}{3}$

$\frac{21}{5}$

$5 \times 3 = 15$
$16 - 15 = 1$
